

Flemish Glass Has Changed

OLD

NEW

GlassCraft is no longer able to provide our valued customers with the old Flemish glass texture. This sudden change is due to circumstances beyond control.

In order to continue to supply you and your customers with this fashionable glass texture GlassCraft has been able to secure a new **Flemish Design** glass texture.

The new Flemish Design glass option has retained the uneven clear glass pattern of the older translucent Flemish texture, while incorporating a tighter more obscure pattern improving privacy.

All GlassCraft doors or glass IG units shipped from October 10, 2008 with a Flemish glass option will ship with the new **Flemish Design** glass texture.

Please contact your sales representative for new samples if you have not already received them.
