

GlassCraft offers our premium fiberglass doors prehung in solid composite frames in both non-impact and wind-storm rated impact versions. The composite material is a wood-plastic composite, and has a wood grain. These frames may be stained or painted, and the prehung units are available factory finished to match a prefinished fiberglass door. "Impact" rated prehung units are rated by the States of Florida and Texas.

Composite Components: Jamb legs and brick mold are available. Over 90% of the material used to produce our composite components are produced from recycled plastic or wood. It accepts nails, staples, and screws within 1/2" of edge, and it has a low linear expansion from high or low temperature. Non-splintering, it will not twist, and has excellent screw and nail retention. Cuts with any fine-tooth miter saw, and routes out beautifully with little or no chipping or ragged edges. Accepts paint and stain like real wood...does not need priming. Please refer to our Composite Components brochure for complete information on our composite component program. This flyer is available at www.glasscraft.com. Aluminum-wood veneered t-astragals are used with Impact double door units and mahogany t-astragals are used on Non-Impact units.

IMPACT and NON-IMPACT Prehanging: We can prehang the four entry configurations shown in this flyer using our 3' 0" or 2' 8" wide and 6' 8" or 8' 0" tall fiberglass doors and sidelites. Prehung units include brick mould, door sweep, weatherstripping, and adjustable threshold, plus 3 hinges on 6' 8" doors and 4 hinges on 8' 0" doors, plus astragals where applicable. IMPACT prehung units also include all door lockset and handleset hardware and a multipoint lock system...all "sea-spray" rated. (Refer to page 8 in our Fiberglass

Door color catalog for options for these multipoint lock systems). All prehung units shown includes the use of composite jamb materials...no wood parts are used. Prehung units may be ordered unfinished or prefinished to match your door. **Please note that, for NON-IMPACT and IMPACT entryways, we use double jamb legs (no mull posts) between sidelites and the door. This does not allow for a continuous sill. but provides a strong assembly for wind-storm installations.**

Jamb Kits: Our composite jamb kits include the necessary component parts to construct the four entry configurations shown in this brochure for NON-IMPACT installations only. These kits are not mortised, bored, or fitted, and include component length materials only—assembly is required. Kits do not include door, glass, sill, or hardware. Kits are packaged in individual boxes for shipping.

Prefinishing Composite Prehang Entryways: The four entry configurations shown are available professionally prefinished to match our fiberglass doors. Refer to our Premium Fiberglass Door catalog pages 6 and 7 for color choices for both our Traditional Finish and our Distressed Finish. List pricing for finish on these entryways is shown for each configuration below. These finish prices include finish of the door slab(s) and the jamb components.

	Traditional Finish	Distressed Finish
Single door entry prefinish	\$790 (FIN1-5PH)	\$1100 (FIN3-5PH)
Single door - 1 sidelite entry prefinish	\$1050 (FIN1-6PH)	\$1625 (FIN3-6PH)
Single door - 2 sidelites entry prefinish	\$1415 (FIN1-1PH)	\$1975 (FIN3-1PH)
Double door entry prefinish	\$1260 (FIN1-9PH)	\$1775 (FIN3-9PH)

Single Door

Prehung Unit: Single 32" or 36" X 6' 8" or 8'0" Door for 4 5/8" or 6 5/8" installations.

Jamb Kit: includes jamb legs, header, brick mould and compression weatherstrip. Kit may be used with 3' 0" or 2' 8" door widths. Does not include door, sill, hardware or glass panel.
